Skills

- **Languages:** PHP, C#, golang, Python, JavaScript, Node.js
- **Databases:** SQL, MySQL, PostgreSQL, MongoDB, SQL Server, oracle
- **Frameworks:** Laravel, Symfony, Codeigniter
- **Web Development:** React, Vue.js, Angular
- **Cloud:** AWS, Heroku
- **Tests:** Postman, PHPunit, Behat

Summary

With over 13 years of experience across retail, logistics, real estate software, digital banking, and startups. I've led technology projects, expertly gathering requirements with stakeholders and managing project timelines using agile methodologies like Scrum. Notably, I've innovated and evolved platforms for advertising sites by identifying gaps and integrating high-tech solutions. Skilled in languages and tools including Python, Java, SQL, Node.js, AWS, and many more. I thrive on creating effective management reports and supporting strategic decision-making. Friendly and collaborative, I enjoy working with cross-functional teams to drive success and innovation.

Experience

- LL Loyalty**
Senior Fullstack Developer

May 2024 - Present

 - **Context:** Serving as a fullstack developer, ensuring all activities are executed in accordance with the policies established by Pasquali Solution and aligned with the business strategy. Developing routines and internal integrations to meet strategic leadership demands. Actively participating in requirements gathering for the creation of minimum viable products (MVPs), ensuring alignment with project needs. Executing maintenance in the production environment, solving reported bugs, contributing to the system's stability. Developing management reports, monitoring performance indicators, and providing support for strategic decision-making.
- PASQUALI SOLUTION**
Senior Fullstack Developer

Jul 2023 - May 2024

 - **Context:** Developing routines and internal integrations to meet strategic leadership demands. Participating in requirements gathering for MVP creation, ensuring alignment with project needs. Executing maintenance in the production environment, solving reported bugs, contributing to the system's stability. Developing management reports, monitoring performance indicators, and providing support for strategic decision-making.
- ESTRELA10**
Senior Backend Engineer

Mar 2023 - Jul 2023

 - **Context:** Planning and executing backend engineering projects, ensuring alignment with company directives. Supporting requirements gathering, ensuring comprehension of needs and delivery of aligned solutions. Developing internal routines and integrations to meet strategic directorial demands. Developing management reports and monitoring KPIs, presenting results to senior management for strategic decision support.
- ATLAS TECHNOLOGIES**
Senior Backend Engineer

Jun 2021 - Mar 2023

 - **Context:** Developing and supporting the connection between strategy, performance, actions, and market for priority fronts of the company. Developing routines and products for an advertising website, contributing to its evolution and innovation. Refactoring legacy code to improve system quality and efficiency.
- YOUSYNC**
Web Developer

Mar 2019 - May 2021

 - **Context:** Developing specific routines and integrations for the HealthTech sector, ensuring efficiency and precision of web solutions. Participating in requirements gathering, understanding project needs, and defining clear functionalities and features. Developing continuous improvements in existing routines, enhancing performance and adaptability of solutions developed.
- UNION SOFTWARES**
Web Developer

Apr 2017 - Oct 2019

 - **Context:** Maintaining and creating specific routines for the real estate market, ensuring efficient operation and

updating of web applications. Participating in the development of improvements in existing routines, optimizing processes, and meeting market demands.

OPS WEB

Oct 2016 - Mar 2017

Developer

- **Context:** Identifying and correcting bugs, enhancing the performance and usability of web applications. Developing improvements and updates in codes using best development practices, ensuring scalability and security.

GRUPO JLJ EMPRESAS

Jul 2013 - Jul 2014

Developer

- **Context:** Maintaining and creating web applications and reports using relevant technologies and tools, ensuring the full functioning and efficiency of systems.
