Professional Summary

SENIOR SOFTWARE ENGINEER | BACKEND ARCHITECT | SCALABLE SAAS PLATFORMS

Senior Software Engineer with 13+ years of experience designing, modernizing, and scaling business-critical systems for fintechs, marketplaces, loyalty platforms, logistics, and healthtech companies. Strong expertise in backend architecture, legacy modernization, microservices, cloud environments, and enterprise integrations. Proven experience working on high-traffic applications, scalable SaaS platforms, and complex production environments focused on performance, maintainability, reliability, and long-term scalability. Experienced in driving architectural improvements, reducing technical debt, improving engineering quality, and supporting mission-critical systems used by thousands of users and enterprise clients.

Core Expertise

Backend & Architecture: PHP, Laravel, Symfony, Zend Framework, REST APIs, Microservices, SOLID, Clean Architecture, SaaS Platforms

Frontend: React, Vue.js, JavaScript

Cloud & DevOps: AWS, Docker, CI/CD, Production Environments

Databases: MySQL, PostgreSQL, MongoDB, SQL Server, Oracle

Engineering Practices: PHPUnit, Code Review, Refactoring, Legacy Modernization, Technical Planning, Agile/Scrum

Professional Experience

Senior Software Engineer — Rock Encantech | Mar 2025 – Jan 2026

- Led backend initiatives and architectural improvements for a microservices-based loyalty marketplace platform.
- Designed and developed scalable integrations and business-critical features focused on loyalty points management and exchange operations.
- Worked on scalability, security, and high-availability improvements supporting enterprise-level operations.
- Collaborated in technical decision-making and long-term platform evolution.

Senior Software Engineer — LL Loyalty | Jun 2024 – Mar 2025

- Developed scalable backend solutions and enterprise integrations for loyalty marketplace platforms.
- Participated in MVP technical planning and implementation for fintech-oriented products.
- Improved production stability, maintainability, and engineering quality in critical environments.
- Worked with microservices architecture focused on scalability and operational efficiency.

Senior Full Stack Developer — Pasquali Solution | Aug 2023 – Jul 2024

- Designed and developed scalable enterprise integrations and backend solutions for strategic clients.
- Led modernization efforts in legacy systems improving maintainability and long-term scalability.
- Implemented automated tests and engineering best practices using SOLID and Clean Architecture.
- Supported critical production environments and resolved high-priority operational issues.
- Worked with Laravel, Symfony, React, Vue.js, AWS, MySQL, and PostgreSQL.

Senior Backend Engineer — Atlas Technologies | Jul 2021 – Apr 2023

- Developed and optimized backend services for a high-traffic marketplace platform handling millions of monthly visits.
- Refactored legacy systems improving scalability, maintainability, and engineering quality.
- Built integrations and new platform features supporting large-scale marketplace operations.
- Collaborated in strategic technical improvements focused on long-term platform reliability and performance.
- Main client: Fatal Model.

Web Developer — YouSync | Apr 2019 – Jun 2021

- Developed integrations and automation routines for HealthTech enterprise clients.
- Delivered business-critical solutions for companies including Petz and Ricoh.
- Worked on operational efficiency improvements and scalable management systems.

Web Developer — Union Softwares | May 2017 – Nov 2019

- Maintained and evolved systems focused on the real estate market.
- Supported the migration of more than 5,000 active clients while maintaining platform stability and uninterrupted operations.
- Worked on workflow optimization and system modernization initiatives.

Education

UniCesumar — CST in Internet Systems (2025 – 2027)

Instituto Federal de São Paulo (IFSP) — Technical Degree in Systems Development

Certifications

• Scrum Fundamentals Certified (SFC)
• Clean Architecture
• SOLID Principles
• Software Architecture and Design Patterns

Languages

Portuguese — Native
English — Full Professional Proficiency
Spanish — Basic
German — Basic
